About App

This app is designed to address hunger and promote food security by connecting individuals and communities with local food banks. Users can locate nearby food banks, report hunger-related issues, share surplus food with others, and access educational resources about nutrition and sustainability. With a user-friendly interface and essential tools, the app aims to support the United Nations' Sustainable Development Goal 2 (Zero Hunger) by fostering community-driven solutions to end hunger and build a healthier, more secure world.
